[LinkedIn](#) · [GitHub](#) · [TryHackMe](#)

Professional Summary

SOC Analyst Trainee with hands-on cybersecurity experience and a First-Class BSc (Hons) in Computer Science. Skilled in OSINT investigation and threat profiling, now applying these skills toward SOC and threat intel workflows. Ranked in the top 2% globally on TryHackMe (115 completed rooms, 17 badges).

Currently preparing for CompTIA Security+ to strengthen knowledge in alert triage and open-source threat research to support SOC and risk operations.

Technical Skills

- **Security and Threat Detection:** SIEM (Splunk), Sysmon, Windows Logs, OSINT
- **Scripting and Programming:** Python, Bash, PowerShell, C, ARM ASM
- **Systems Admin:** Group Policy, Linux Hardening, Virtualisation
- **Incident Response:** Wireshark, TCP/IP, Firewalls

Cybersecurity Projects

ActiveReconLite · Python Port Scanner

FEB 2025 – MAR 2025

Built a Python-based TCP connect port scanner using multiprocessing. Scanned 65k ports in 5s (vs Nmap's 5m). It validates user input, grabs banners, and writes results to a file. Demonstrates automation, socket programming, and parallel scanning.

github.com/mbeardwell/active-recon-lite

Location and Identity Resolution from Minimal Public Signals · OSINT Case Study

APR 2025

Tracked real-world identity from anonymised YouTube uploads using public data. Shows attacker thinking, threat profiling, and privacy risk awareness. Demonstrates threat intelligence process fundamentals: collection, enrichment, analysis, and attribution based on minimal public indicators.

github.com/mbeardwell/osint-i3-case-study

Faster Dynamically Instrumented Programs · Bachelor's Thesis

OCT 2022 – MAY 2023

Built a runtime patching tool on ARM Linux to redirect processor instructions in memory. Mirrors techniques used in evasive malware — useful for SOC detection and threat hunting.

github.com/mbeardwell/arm-fp-emu

Professional Experience

Building expertise during ongoing health recovery. Not currently available for roles. Open to future opportunities.

SOC Training and Labs · TryHackMe (Self-Led Learning)

FEB 2022 – PRESENT

Developed hands-on expertise in SIEM and security automation through 115 cybersecurity labs (Top 2% globally). Applied log analysis, detection logic, and SOC tooling in simulation labs.

Private Tutor · Freelance

SEP 2016 – NOV 2019

Supported children with pre-GCSE homework, primarily in maths; adapted explanations to varying ability levels in informal settings.

Research and Documentation Intern · Indo UK Institute of Health

JUN 2017 – AUG 2017

Conducted market research on employee benefits and strategic partnerships, providing executives with key insights. Edited and reformatted high-level strategic documents that shaped discussions on a billion-pound health-care initiative.

Education and Certifications

BSc (Hons) CS · King's College London

1st Class

SEP 2018 – JUL 2023

A-Levels · King's Maths School

A* A* A* A*

SEP 2016 – JUL 2018

Certifications

CompTIA	Security+	(IN PROGRESS)
TryHackMe	Intro to Cyber Security	FEB 2024
TryHackMe	Pre-Security	APR 2022
Security Blue Team	Intro to OSINT	JUN 2025
Prince's Trust	TEAM (12-week programme incl. First Aid)	JAN 2024 – APR 2024
