

MATTHEW BEARDWELL

Watford, Hertfordshire | [mbeardwell.github.io](#) | [matthewbeardwell@gmail.com](#)

PROFESSIONAL SUMMARY

Aspiring SOC Analyst with hands-on cybersecurity experience and a First-Class BSc in Computer Science. Strong in **SIEM, OSINT, and security automation**, applying advanced threat detection techniques in real-world lab scenarios. Ranked in the **top {{TOP_PERCENTAGE}}% globally on TryHackMe** ({{ROOMS}} completed rooms, {{BADGES}} badges). Currently preparing for **CompTIA Security+** to strengthen expertise in SOC workflows and incident response.

TECHNICAL SKILLS

- Security & Threat Detection:** SIEM (Splunk), Windows Event Logs, Sysmon, OSINT
- Programming & Scripting:** Python, Bash, PowerShell, C, ARM Assembly
- Systems & Administration:** Windows (Group Policy, Sysmon), Linux (Security Hardening), Virtualisation
- Incident Response & Monitoring:** Wireshark, TCP/IP, Firewalls, Linux Hardening

CYBERSECURITY PROJECTS

- TCP Port Scanner (2025)**
Developed a high-performance Python-based network scanner with multithreading, improving efficiency in identifying live hosts for security assessments and penetration testing. Demonstrates strong skills in automation, network scanning, and multithreaded programming.
Technologies: Python, Multithreading, Network Scanning
Project Link: <https://github.com/mbeardwell/simple-port-scanner>
- ARM Floating Point Emulation | Bachelor's Thesis (2023)**
Designed and implemented a dynamic code modification technique that intercepts processor instructions at runtime, demonstrating low-level reverse engineering and malware analysis applications.
Technologies: C, ARM Assembly, Dynamic Binary Instrumentation
Project Link: <https://github.com/mbeardwell/arm-fp-emu>

EXPERIENCE

- SOC Training & Labs | TryHackMe (Self-Led Learning)** Feb 2022 – Present
Developed hands-on expertise in SIEM, threat hunting, and security automation through **{{ROOMS}} cybersecurity labs (Top {{TOP_PERCENTAGE}}% globally)**. Applied **log analysis, threat detection, and SOC tools** in simulated security operations, mirroring real-world threat-hunting scenarios.
- Retail Assistant | Max Spielmann (Prince's Trust Work Placement)** Feb 2024 – Mar 2024
Processed transactions, assisted customers with self-service kiosks and mobile integration, and ensured **secure deletion** of processed passport photos.
- Private Maths Tutor | Freelance** Sep 2016 – Nov 2019
Delivered **structured problem-solving sessions**, strengthening logical thinking, and adapted teaching methods to **improve communication skills**.
- Research & Documentation Intern | Indo UK Institute of Health** Jun 2017 – Aug 2017
Conducted **market research** on employee benefits and strategic partnerships, providing **executives with key insights**. Edited and reformatted **high-level strategic documents** that shaped discussions on a billion-pound healthcare initiative.

EDUCATION & CERTIFICATIONS

BSc Computer Science	King's College London (1st Class Honours)	Sep 2018 – Jun 2023
A-Levels	King's College London Mathematics School (4 A*s)	Sep 2016 – Jun 2018
GCSE & IGCSEs	9 A*s, 1 B (incl. A* in Computing, Maths, Sciences)	Sep 2014 – Jun 2016
Certifications	CompTIA Security+	(In Progress)
	TryHackMe 'Introduction to Cyber Security'	Feb 2024
	TryHackMe 'Pre Security'	Apr 2022
	Prince's Trust Level 2 Certificate (12-week employability program)	Jan 2024 – Apr 2024
