

Matthew Beardwell

Watford, Hertfordshire · [mbeardwell.com](#) · [contact@mbeardwell.com](#) · [LinkedIn](#) · [GitHub](#) · [TryHackMe](#)

Professional Summary

SOC Analyst Trainee with hands-on cybersecurity experience and a First-Class BSc (Hons) in Computer Science. Skilled in OSINT investigation and threat profiling, now applying these skills toward SOC and threat intel workflows. Ranked in the top 2% globally on TryHackMe (115 completed rooms, 17 badges). Currently preparing for CompTIA Security+ to strengthen knowledge in alert triage and open-source threat research to support SOC and risk operations.

Technical Skills

- **Security and Threat Detection:** SIEM (Splunk), Sysmon, Windows Logs, OSINT
- **Scripting and Programming:** Python, Bash, PowerShell, C, ARM ASM
- **Incident Response:** Wireshark, TCP/IP, Firewalls
- **Threat Intelligence:** OSINT tooling, actor profiling, digital footprint resolution

Cybersecurity Projects

ActiveReconLite · *Python Port Scanner* FEB 2025 – MAR 2025
Built a Python-based TCP connect port scanner using multiprocessing. Scanned 65k ports in 5s (vs Nmap's 5m). It validates user input, grabs banners, and writes results to a file. Demonstrates automation, socket programming, and parallel scanning. [github.com/mbeardwell/active-recon-lite](#)

Location and Identity Resolution from Minimal Public Signals · *OSINT Case Study* APR 2025
Tracked real-world identity from anonymised YouTube uploads using public data. Shows attacker thinking, threat profiling, and privacy risk awareness. Demonstrates threat intelligence process fundamentals: collection, enrichment, analysis, and attribution based on minimal public indicators. [github.com/mbeardwell/osint-i3-case-study](#)

UK HUMINT OSINT Toolkit JUN 2025
Curation of UK-only, legal person-focused OSINT resources for investigative use. Supports human profiling, exposure tracking, and background validation tasks. [github.com/mbeardwell/osint-humint-toolkit](#)

Faster Dynamically Instrumented Programs · *Bachelor's Thesis* OCT 2022 – MAY 2023
Built a runtime patching tool on ARM Linux to redirect processor instructions in memory. Mirrors techniques used in evasive malware – useful for SOC detection and threat hunting. [github.com/mbeardwell/arm-fp-emu](#)

Professional Experience

Building expertise during ongoing health recovery. Not currently available for roles. Open to future opportunities.

SOC Training and Labs · *TryHackMe (Self-Led Learning)* FEB 2022 – PRESENT
Developed hands-on expertise in SIEM and security automation through 115 cybersecurity labs (Top 2% globally). Applied log analysis, detection logic, and SOC tooling in simulation labs.

Private Tutor · *Freelance* SEP 2016 – NOV 2019
Supported children with pre-GCSE homework, primarily in maths; adapted explanations to varying ability levels in informal settings.

Research and Documentation Intern · *Indo UK Institute of Health* JUN 2017 – AUG 2017
Conducted market research on employee benefits and strategic partnerships, providing executives with key insights. Edited and reformatted high-level strategic documents that shaped discussions on a billion-pound health-care initiative.

Education and Certifications

BSc (Hons) CS · <i>King's College London</i>	First-Class	SEP 2018 – JUL 2023
A-Levels · <i>King's Maths School</i>	A* A* A* A*	SEP 2016 – JUL 2018

Certifications		
CompTIA	Security+	(IN PROGRESS)
TryHackMe	Intro to Cyber Security	FEB 2024
Security Blue Team	Intro to OSINT	JUN 2025
TryHackMe	Pre-Security	APR 2022
Prince's Trust	TEAM (12-week programme incl. First Aid)	JAN 2024 – APR 2024
