

Matthew Beardwell

Watford, Hertfordshire · contact@mbeardwell.com · mbeardwell.com · [LinkedIn](#) · [GitHub](#) · [TryHackMe](#)

Professional Summary

SOC Analyst Trainee with hands-on cybersecurity experience and a First-Class BSc (Hons) in Computer Science. Skilled in OSINT investigation and threat profiling, now applying these skills toward SOC and threat intel workflows. Ranked in the top 2% globally on TryHackMe (116 completed rooms, 17 badges). Currently preparing for CompTIA Security+ to strengthen knowledge in alert triage and open-source threat research to support SOC and risk operations.

Technical Skills

- **Security and Threat Detection:** SIEM (Splunk), Sysmon, Windows Logs, OSINT
- **Scripting and Programming:** Python, Bash, PowerShell, C, ARM ASM
- **Incident Response:** Wireshark, TCP/IP, Firewalls
- **Threat Intelligence:** OSINT tooling, actor profiling, digital footprint resolution

Cybersecurity Projects

- ActiveReconLite** · *Python Port Scanner* FEB 2025 – MAR 2025
Built a Python-based TCP connect port scanner using multiprocessing. Scanned 65k ports in 5s (vs Nmap's 5m). It validates user input, grabs banners, and writes results to a file. Demonstrates automation, socket programming, and parallel scanning. github.com/mbeardwell/active-recon-lite
- Location and Identity Resolution from Minimal Public Signals** · *OSINT Case Study* APR 2025
Tracked real-world identity from anonymised YouTube uploads using public data. Shows attacker thinking, threat profiling, and privacy risk awareness. Demonstrates threat intelligence process fundamentals: collection, enrichment, analysis, and attribution based on minimal public indicators. github.com/mbeardwell/osint-i3-case-study
- UK Person-centric OSINT Toolkit** JUN 2025
Curation of UK-only, legal person-focused OSINT resources for investigative use. Supports human profiling, exposure tracking, and background validation tasks. github.com/mbeardwell/uk-personal-osint-toolkit
- Faster Dynamically Instrumented Programs** · *Bachelor's Thesis* OCT 2022 – MAY 2023
Built a runtime patching tool on ARM Linux to redirect processor instructions in memory. Mirrors techniques used in evasive malware – useful for SOC detection and threat hunting. github.com/mbeardwell/arm-fp-emu

Professional Experience

- Building expertise during ongoing health recovery. Not currently available for roles. Open to future opportunities.*
- SOC Training and Labs** · *TryHackMe (Self-Led Learning)* FEB 2022 – PRESENT
Developed hands-on expertise in SIEM and security automation through 116 cybersecurity labs (Top 2% globally). Applied log analysis, detection logic, and SOC tooling in simulation labs.
- Private Tutor** · *Freelance* SEP 2016 – NOV 2019
Supported children with pre-GCSE homework, primarily in maths; adapted explanations to varying ability levels in informal settings.
- Research and Documentation Intern** · *Indo UK Institute of Health* JUN 2017 – AUG 2017
Conducted market research on employee benefits and strategic partnerships, providing executives with key insights. Edited and reformatted high-level strategic documents that shaped discussions on a billion-pound health-care initiative.

Education and Certifications

BSc (Hons) CS · <i>King's College London</i>		First-Class	SEP 2018 – JUL 2023
A-Levels · <i>King's Maths School</i>		A* A* A* A*	SEP 2016 – JUL 2018
Certifications			
CompTIA	Security+		(IN PROGRESS)
TryHackMe	Intro to Cyber Security		FEB 2024
Security Blue Team	Intro to OSINT		JUN 2025
TryHackMe	Pre-Security		APR 2022
Prince's Trust	TEAM (12-week programme incl. First Aid)		JAN 2024 – APR 2024
