

# MATTHEW BEARDWELL

Watford, Hertfordshire · [mbeardwell.com](https://mbeardwell.com) · [contact@mbeardwell.com](mailto:contact@mbeardwell.com)  
[LinkedIn](#) · [GitHub](#) · [TryHackMe](#)

## Professional Summary

SOC Analyst Trainee with hands-on cybersecurity experience and a First-Class BSc in Computer Science. Strong in SIEM, OSINT, and security automation, applying advanced threat detection techniques in real-world lab scenarios. Ranked in the top 2% globally on TryHackMe (114 completed rooms, 16 badges). Currently preparing for CompTIA Security+ to strengthen expertise in SOC workflows and incident response.

## Technical Skills

- **Security and Threat Detection:** SIEM (Splunk), Sysmon, Windows Logs, OSINT
- **Scripting and Programming:** Python, Bash, PowerShell, C, ARM ASM
- **Systems Admin:** Group Policy, Linux Hardening, Virtualisation
- **Incident Response:** Wireshark, TCP/IP, Firewalls

## Cybersecurity Projects

**‘ActiveReconLite’** Feb 2025 – Mar 2025  
Developed a high-performance Python-based network scanner with multithreading, achieving a 98% speed improvement vs ‘nmap’ on localhost full-port scans (5s vs 304s, 65,535 ports); validated with ‘time’ benchmarks assisting in identifying live hosts for security assessments and penetration testing. Demonstrates strong skills in automation, network scanning, and multithreaded programming.  
[github.com/mbeardwell/active-recon-lite](https://github.com/mbeardwell/active-recon-lite)

Technologies: Python, Multithreading, Network Scanning  
**‘Faster Dynamically Instrumented Programs’** · Bachelor’s Thesis Oct 2022 – May 2023  
Designed and implemented a dynamic code modification technique that intercepts processor instructions at runtime, demonstrating low-level reverse engineering and malware analysis applications.  
[github.com/mbeardwell/arm-fp-emu](https://github.com/mbeardwell/arm-fp-emu)  
Technologies: C, ARM Assembly, Dynamic Binary Instrumentation

## Professional Experience

Building expertise during ongoing health recovery. Not currently available for roles. Open to future opportunities.

**SOC Training and Labs** · TryHackMe (Self-Led Learning) Feb 2022 – Present  
Developed hands-on expertise in SIEM, threat hunting, and security automation through 114 cybersecurity labs (Top 2% globally). Applied log analysis, threat detection, and SOC tools in simulated security operations, mirroring real-world threat-hunting scenarios.

**Retail Assistant** · Max Spielmann (Prince’s Trust Work Placement) Feb 2024 – Mar 2024  
Processed transactions, assisted customers with self-service kiosks and mobile integration, and ensured secure deletion of processed passport photos.

**Private Maths Tutor** · Freelance Sep 2016 – Nov 2019  
Delivered structured problem-solving sessions, strengthening logical thinking, and adapted teaching methods to improve communication skills.

**Research and Documentation Intern** · Indo UK Institute of Health Jun 2017 – Aug 2017  
Conducted market research on employee benefits and strategic partnerships, providing executives with key insights. Edited and reformatted high-level strategic documents that shaped discussions on a billion-pound healthcare initiative.

## Education and Certifications

|                                                        |                                                     |                     |
|--------------------------------------------------------|-----------------------------------------------------|---------------------|
| <b>BSc Computer Science</b>                            | King’s College London (1st Class Honours)           | Sep 2018 – Jun 2023 |
| <b>A-Levels</b>                                        | King’s College London Mathematics School (4 A*s)    | Sep 2016 – Jun 2018 |
| <b>GCSE and IGCSEs</b>                                 | 9 A*s, 1 B (incl. A* in Computing, Maths, Sciences) | Sep 2014 – Jun 2016 |
| <b>Certifications</b>                                  |                                                     |                     |
