

# MATTHEW BEARDWELL

Watford, Hertfordshire · [mbeardwell.com](https://mbeardwell.com) · [contact@mbeardwell.com](mailto:contact@mbeardwell.com)

## Professional Summary

SOC Analyst Trainee with hands-on cybersecurity experience and a First-Class BSc in Computer Science. Strong in SIEM, OSINT, and security automation, applying advanced threat detection techniques in real-world lab scenarios. Ranked in the top 2% globally on TryHackMe (114 completed rooms, 16 badges). Currently preparing for CompTIA Security+ to strengthen expertise in SOC workflows and incident response.

## Technical Skills

- **Security and Threat Detection:** SIEM (Splunk), Windows Event Logs, Sysmon, OSINT
- **Programming and Scripting:** Python, Bash, PowerShell, C, ARM Assembly
- **Systems and Administration:** Windows (Group Policy, Sysmon), Linux (Security Hardening), Virtualisation
- **Incident Response and Monitoring:** Wireshark, TCP/IP, Firewalls, Linux Hardening

## Cybersecurity Projects

**TCP Port Scanner**

2025

Developed a high-performance Python-based network scanner with multithreading, improving efficiency in identifying live hosts for security assessments and penetration testing. Demonstrates strong skills in automation, network scanning, and multithreaded programming.

Technologies: Python, Multithreading, Network Scanning

[github.com/mbeardwell/simple-port-scanner](https://github.com/mbeardwell/simple-port-scanner)

**ARM Floating Point Emulation** · Bachelor's Thesis

2023

Designed and implemented a dynamic code modification technique that intercepts processor instructions at runtime, demonstrating low-level reverse engineering and malware analysis applications.

Technologies: C, ARM Assembly, Dynamic Binary Instrumentation

## Professional Experience

**SOC Training and Labs** · TryHackMe (Self-Led Learning)

Feb 2022 – Present

Developed hands-on expertise in SIEM, threat hunting, and security automation through 114 cybersecurity labs (Top 2% globally). Applied log analysis, threat detection, and SOC tools in simulated security operations, mirroring real-world threat-hunting scenarios.

**Retail Assistant** · Max Spielmann (Prince's Trust Work Placement)

Feb 2024 – Mar 2024

Processed transactions, assisted customers with self-service kiosks and mobile integration, and ensured secure deletion of processed passport photos.

**Private Maths Tutor** · Freelance

Sep 2016 – Nov 2019

Delivered structured problem-solving sessions, strengthening logical thinking, and adapted teaching methods to improve communication skills.

**Research and Documentation Intern** · Indo UK Institute of Health

Jun 2017 – Aug 2017

Conducted market research on employee benefits and strategic partnerships, providing executives with key insights. Edited and reformatted high-level strategic documents that shaped discussions on a billion-pound healthcare initiative.

## Education and Certifications

|                             |                                                                 |                     |
|-----------------------------|-----------------------------------------------------------------|---------------------|
| <b>BSc Computer Science</b> | King's College London (1st Class Honours)                       | Sep 2018 – Jun 2023 |
| <b>A-Levels</b>             | King's College London Mathematics School (4 A*s)                | Sep 2016 – Jun 2018 |
| <b>GCSE and IGCSEs</b>      | 9 A*s, 1 B (including A* in Computing, Maths, and the Sciences) | Sep 2014 – Jun 2016 |
| <b>Certifications</b>       | CompTIA Security+                                               | (In Progress)       |
|                             | TryHackMe 'Introduction to Cyber Security'                      | Feb 2024            |
|                             | TryHackMe 'Pre Security'                                        | Apr 2022            |
|                             | Prince's Trust Level 2 (12-week employability program)          | Jan 2024 – Apr 2024 |
